Special Publication 7

## *ATLAS* of *Non-Silicate* *MINERALS* in *Thin Section*

**By Joan Carles Melgarejo and Robert F. Martin**

The Atlas of Non-Silicate Minerals in Thin Section, Special Publication 7 of The Canadian Mineralogist, presents an exhaustive compilation of information about most of the non-silicate mineral species likely to be encountered in advanced research in the geological sciences. The book contains information on 408 minerals amenable to study with transmitted-light microscopy. The contents of the book are organized according to the traditional Dana classification of minerals. The environment of formation of each mineral is keyed to important citations to the literature. All photos used to illustrate the attributes of the minerals are placed on a DVD included with the book.

ISBN 978-0-921294-51-1, SP 7, hard cover, 528 pages, DVD-ROM, 2011

In Canada **CDN \$125**, Students **\$100** – Outside Canada **US \$125**, Students **\$100** – (Member Price **CDN \$100/US \$100** / Student member **\$80**)

Please send \_\_\_\_\_ copy (ies) of *ATLAS OF NON-SILICATE MINERALS IN THIN SECTION*
