

## TABLE OF CONTENTS

Preface	xiii
Preface to Second Edition	xiv
1. Diamond	1
2. The geology and genesis of gem corundum deposits	29
3. Geology of gems and their geographic origin	113
4. Emerald	135
5. Non-emerald beryl	175
6. Chrysoberyl	207
7. Tanzanite and tsavorite	217
8. Topaz	247
9. Gem-bearing pegmatites	257
10. Geology of jade deposits	305
11. Coloured gemstones from Canada	375

## DETAILED LIST OF CONTENTS

---

<b>1. DIAMOND – THOMAS STACHEL</b>	<b>1</b>
INTRODUCTION	1
ORIGIN OF DIAMOND IN EARTH'S MANTLE	3
DIAMOND MORPHOLOGY	4
Primary and secondary shapes	4
Common surface features	5
OPTICAL CENTERS	6
Diamond "types" and their relative abundances	7
STABLE ISOTOPIC COMPOSITION OF DIAMONDS	9
INCLUSIONS IN DIAMOND	11
Peridotitic inclusion suite	12
Eclogitic inclusions suite	13
Websteritic suite	13
Sublithospheric inclusions	15
Mineral inclusion-based geothermometry	15
Fluid and melt inclusions in diamond	17
TIMING OF DIAMOND FORMATION	18
Nitrogen aggregation and age of diamonds	18
Radiometric dating of inclusions	18
CONCLUSIONS	21
REFERENCES	21

<b>2. THE GEOLOGY AND GENESIS OF GEM CORUNDUM DEPOSITS – GASTON GIULIANI, DANIEL OHNENSTETTER, ANTHONY FALICK, LEE GROAT AND ANDREW FAGAN</b>	<b>29</b>
INTRODUCTION	29
HISTORY, GEOGRAPHIC DISTRIBUTION AND ECONOMIC SIGNIFICANCE	29
MINERALOGY, PHYSICAL PROPERTIES AND GEOCHEMISTRY	36
THE GEOLOGY OF GEM CORUNDUM DEPOSITS	39
The Pan-African orogeny (750 – 450 Ma)	40
The Cenozoic Himalayan orogeny (45 Ma – Quaternary)	42
The Cenozoic alkali basalt extrusions (65 Ma – Quaternary)	43
CLASSIFICATION OF CORUNDUM DEPOSITS	43
GEOLOGY AND GENESIS OF PRIMARY CORUNDUM DEPOSITS	45
Magmatic deposits	45
Sapphire in lamprophyric dikes (xenocryst)	45
Sapphire in syenite (megacryst)	49
Corundum in porphyry Cu deposits (accessory mineral)	51
Corundum in alkali basalt (xenocryst and xenolith)	51
Corundum in kimberlite (accessory mineral, xenocryst and xenolith)	58
Metamorphic deposits	58
Metamorphic deposits associated with desilicated pegmatite and skarn-related granite or mafic-ultramafic rocks	59
Metamorphic deposits associated with biotite and cordierite in gneiss	69
Metamorphic deposits associated with marble	72
Metamorphic deposits in granulite, charnockite and gneiss	81
Metamorphic deposits in migmatite	82
Metamorphic deposits in amphibolite and gabbro	83

Metamorphic deposits in ultramafic rocks	88
<b>GEOLOGY AND GENESIS OF SECONDARY CORUNDUM DEPOSITS</b>	<b>88</b>
Placer deposits in marble environments: the case of Vietnam	90
Placer deposits in alkali basalt fields: the case of the French Massif Central	90
Placer deposits in sedimentary fields: the case of Ilakaka (Madagascar)	91
<b>SUMMARY</b>	<b>94</b>
<b>REFERENCES</b>	<b>96</b>

**3. THE GEOLOGY OF GEMS AND THEIR GEOGRAPHIC ORIGIN – GASTON GIULIANI, LEE GROAT, DANIEL OHNENSTETTER, ANTHONY E. FALICK & JULIEN FENEYROL** **113**

<b>INTRODUCTION</b>	<b>113</b>
<b>GEMS: A MINERAL RESOURCE</b>	<b>113</b>
<b>GEOLOGY AND SOURCE OF GEMS</b>	<b>114</b>
<b>WHEN AND WHY DID HVCG FORM?</b>	<b>116</b>
<b>GENESIS OF COLORED GEM DEPOSITS</b>	<b>118</b>
Emerald-ruby-spinel-tsavorite-tanzanite: products of the metamorphism of Cr-V-C-bearing sedimentary rocks	118
Emerald and alexandrite in magmatic–metasomatic deposits	119
Other types of emerald deposits	122
Other types of ruby deposits	122
Ruby and sapphire in alkali basalts	122
Demantoid deposits	122
<b>GEOLOGICAL <i>VERSUS</i> GEOGRAPHIC ORIGINS OF GEMS</b>	<b>122</b>
Colombian emerald and other emeralds	122
Alexandrite	125
Ruby	125
Blue and colored sapphire	127
Tsavorite	129
Spinel	130
Demantoid	130
<b>CONCLUSIONS</b>	<b>130</b>
<b>REFERENCES</b>	<b>130</b>

**4. EMERALD** **135**

<b>INTRODUCTION</b>	<b>135</b>
<b>THE CRYSTAL CHEMISTRY OF BERYL</b>	<b>135</b>
<b>THE CHEMISTRY OF Be, Cr, AND V</b>	<b>138</b>
<b>PRODUCTION</b>	<b>140</b>
<b>EMERALD DEPOSITS AND OCCURRENCES</b>	<b>140</b>
Afghanistan	140
Australia	140
Austria	141
Brazil	142
Bulgaria	143
Canada	143
China	149
Colombia	149
Egypt	152
India	153
Kazakhstan	153

Madagascar	154
Mozambique	155
Nigeria	155
Norway	155
Pakistan	155
Russia	157
South Africa	157
Spain	158
Tanzania	159
USA	159
Zambia	160
Zimbabwe	161
GENETIC CLASSIFICATION	161
STABLE ISOTOPES	164
EXPLORATION	164
FUTURE RESEARCH	166
REFERENCES	166

---

## **5. NON-EMERALD BERYL** **175**

INTRODUCTION	175
CRYSTAL CHEMISTRY OF BERYL	175
GEOCHEMISTRY OF BERYLLIUM	179
Where does beryllium reside?	179
How is beryllium transported?	180
How is beryllium sequestered?	181
Other considerations	182
Favorable growth environments	182
Geochemistry of beryl chromophores	182
GEOLOGY OF NON-EMERALD GEM BERYL	182
Gem beryl models	183
Pegmatitic	183
Magmatic ( $\pm$ hydrothermal)	184
Interstitial, miarolitic and vesicular	185
Skarns	185
Hydrothermal veins	186
Greisens	186
Importance of host rocks	187
Summary of magmatic models	187
Metamorphic ( $\pm$ hydrothermal)	187
Mobilized beryllium in a focused fluid	187
Mineralogical transformations (mobilized Be without a focused fluid)	189
Summary of metamorphic models	190
Secondary gem beryl deposits	191
Considerations for gem beryl deposit models	191
UNDERSTANDING AND EXPLORING FOR BERYL OCCURRENCES	191
Characterization	192
Petrography and micro-analysis	192
Inclusions in minerals	192
Geochronology	194
Stable isotopes	195
Exploration	195

Geochemical silt and soil sampling	195
Proxy elements/minerals and host rock alteration	196
Heavy mineral fractions	196
Parental granite fertility	196
Structural controls	197
Summary	197
CHAPTER SUMMARY	197
REFERENCES	197

---

<b>6. CHRYSOBERYL</b>	<b>207</b>
INTRODUCTION	207
PHYSICAL PROPERTIES	208
Cat's-eye effect	208
Alexandrite effect	209
CHRYSOBERYL DEPOSIT GEOLOGY	209
Type 1: Pegmatite-hosted deposits	210
Chrysoberyl in rare element pegmatites	210
Type 2: Contact, skarn and regional metamorphic/metasomatic deposits	210
The pegmatite intruding ultramafic rock model	210
The metamorphic/anatexis model	211
Type 3: Placer deposits	213
TREATMENTS AND SYNTHETIC STONES	213
FIELD IDENTIFICATION AND EXPLORATION TECHNIQUES	214
REFERENCES	214

---

<b>7. TSAVORITE AND TANZANITE DEPOSITS</b>	<b>217</b>
INTRODUCTION	217
DISCOVERY, GEOGRAPHIC DISTRIBUTION AND ECONOMIC SIGNIFICANCE	217
MINERALOGY AND GEOCHEMISTRY	220
THE NEOPROTEROZOIC METAMORPHIC MOZAMBIQUE GEM BELT	226
TSAVORITE AND TANZANITE PROVINCES IN THE NMMB	227
Tavorite in Kenya	227
The Mgama Ridge area	229
The Mindi Ridge area	229
The Mangare area with the Aqua-Tsavorite-Nadan II mines	230
The Kuranze mining district	231
Tavorite in Tanzania	231
The Umba-Kalalani area	232
The Lelatema Fold Belt	233
The Tunduru and Ruangwa areas	235
Tavorite in Madagascar	236
Tavorite in Pakistan	237
Tavorite in East Antarctica	238
GENETIC MODELS FOR TSAVORITE AND TANZANITE FORMATION	238
Types of tavorite deposits	238
Role of evaporites in the formation of tavorite	239
A new model for the genesis of tavorite deposits	241
CONCLUSIONS	241
REFERENCES	242

<b>8. TOPAZ – DANIEL MARSHALL &amp; LORI WALTON</b>	<b>247</b>
INTRODUCTION	247
PHYSICAL PROPERTIES	248
TOPAZ DEPOSIT GEOLOGY	249
Rhyolite-associated topaz deposits	250
Pegmatite-associated topaz deposits	250
NYF pegmatite topaz deposits	250
LCT pegmatite topaz deposits	251
Vein-type topaz deposits	251
Greisen-type topaz deposits	251
Skarn-hosted topaz deposits	252
Placer-related topaz deposits	253
TREATMENTS	253
FIELD RECOGNITION	253
EXPLORATION CRITERIA	254
REFERENCES	254
<hr/>	
<b>9. GEM-BEARING PEGMATITES – WILLIAM B. “SKIP” SIMMONS</b>	<b>257</b>
INTRODUCTION	257
Definition of pegmatite	260
PEGMATITE CLASSIFICATION	260
Internal zonation	262
Simple pegmatites	262
Zoned pegmatites	262
Complex pegmatites	265
Regional zonation	267
FORMATION OF PEGMATITIC MELTS	270
Fractional crystallization	270
Anatexis	270
Emplacement of pegmatitic melts	271
Crystallization of pegmatitic melts	271
Rates of pegmatitic crystallization	272
Volatiles and fluxes in pegmatites	273
FORMATION OF MIAROLITIC CAVITIES AND GEM QUALITY CRYSTALS	273
Decompression	274
Depletion of fluxing components such as B, Li, F, and P	275
Fractional crystallization	275
A model for gem pocket development	275
Primary vs. secondary pockets	278
Primary pockets	278
Secondary pockets	279
Wall-rock alteration	279
Pocket rupture	279
POCKET INDICATORS	280
Residual gem material or clay-filled pockets	280
Changes in color, shape, morphology, or texture of rock-forming minerals	281
Fractures, especially radial fracture systems that converge to a point of origin	281
Textural indicators in the massive pegmatite, for example converging ‘pillows’ of feldspars	281
Dilation, intersection of dikes, offsets, attitude change and country rock inclusions in the pegmatite	281
Fractures with small crystals of quartz and other minerals	282

Clay-filled fractures	282
Water leaking out of fractures or miarolitic cavities	282
Spongy appearing pegmatite portions	282
Presence of replacement unit or mineral alteration	282
Appearance of rarer minerals in larger than normal amounts	282
Position in the pegmatite itself, 'pocket zone level'	282
Increasing grain size	283
Increase in level of radioactivity	283
Changes in vegetation	284
Increase in Fe or Mn oxides	284
Summary	284
TOURMALINE-GROUP MINERALS IN PEGMATITES	284
BERYL-GROUP MINERALS IN PEGMATITES	289
Aquamarine	291
Goshenite	291
Heliodor	291
Morganite	291
Cesian beryl	291
Common beryl	291
Red beryl	291
Emerald	291
GEM TOPAZ IN PEGMATITES	293
GEM SPODUMENE IN PEGMATITES	295
GEOPHYSICAL AND GEOCHEMICAL EXPLORATION FOR POCKETS	297
Geophysical methods	297
Geochemical methods	298
REFERENCES	299

<b>10. THE GEOLOGY OF JADE DEPOSITS – GEORGE E. HARLOW, SORENA S. SORENSEN, VIRGINIA B. SISSON AND GUANGHAI SHI</b>	<b>305</b>
INTRODUCTION	305
A short etymology of "jade"	305
The significance of jade	306
JADEITE JADE	308
Overview	308
Varieties	312
Lithologic setting	313
Textures and mineralogy	323
P-T conditions	326
Mode of formation	328
Fluids and their sources	330
Associated serpentinite	336
Mode of formation and tectonic implications	337
NEPHRITE JADE	340
Overview	340
Varieties	341
Mineralogy	341
Lithologic setting	342
Nephrite by dolomite replacement	343
Nephrite associated with serpentinite	347
Conditions of nephrite formation in association with serpentinite	352

Nephrite petrographic microstructure	354
Mode of formation – serpentinite replacement or not?	355
CONCLUSION	357
REFERENCES	358
