Contents

Dedication V

Acknowledgements VII

Preface IX

Introduction 1

Chapter 1

The Building Blocks of Matter 5

- Elementary Particles 7
- The Periodic Table of the Elements 8
- Abundance of the Elements 11

Chapter 2

Crystallography: the Organization of Matter 15

- Amorphous Solids 17
- Crystalline Solids 19
- Crystal Systems (Figure 2-3) 23
- Crystal Symmetry and Crystal Classes 29
- The Symmetry of the Crystal Systems 30
- Crystal Forms 33

Crystallographic Planes and Miller Indices 35
Crystal Growth 42

Chapter 3

Optical Crystallography:
The Behavior of Light in Crystals 53

The Nature of Light 55
Color 57
Light Addition 57
Light Subtraction 57
Light Velocity 58
Index of Refraction 59
Dispersion 61
Polarized Light 63
Polarization by Reflection 64
Polarization by absorption 67
Light in Anisotropic Crystals 67
The Ray-Velocity Surface 67
The “Strange” Refraction of Calcite 68
Ray-velocity surfaces of Calcite 70
Optic Axis and Optic Sign 72
The Uniaxial Indicatrix (Figure 3-15) 74
Birefringence 76
The Biaxial Indicatrix 77

Chapter 4

Refractometry: Index
of Refraction Measurements 83

The Critical Angle Gem Refractometer 85
Relief 91
The Central Illumination or Becke Line Method 93
The Oblique Illumination Method 96
The Hodgkinson Method 97

Chapter 5

Interference Colors and Interference Figures 99

Retardation and Birefringence 101
Wave Interference 102
Interference Figures 108
Uniaxial Interference Figures:
Tetragonal, Trigonal, & Hexagonal 112
Biaxial Interference Figures:
Orthorhombic, Monoclinic, & Triclinic 115

Chapter 6
Color in Minerals 119
Crystal Field Splitting 121
Pleochroism 132
Color Centers 132
Intervalence Transitions 133
Band Theory Transitions:
The Colors of Covalent and Metallic Minerals 134
The Ultramarines 136
Diffraction 136

Chapter 7
Metallic Bonding and the Precious Metals 143
The Metallic Bond 145
The Precious Metals 151
Silver (Ag) – Isometric: *Cubic close packed, metallic bonding* 156
Platinum (Pt) Isometric:
Cubic close packed and hexagonal close packed, metallic bonding 160
Copper (Cu) – Isometric: *Cubic close packed, metallic bonding* 164

Chapter 8
Covalent (Homopolar) Bonding 169
The Covalent (Homopolar) Bond 171
The Complex Anions 178

Chapter 9
Ionic (Polar) Bonding & Crystal Chemistry 179
The Ionic (Polar) Bond 181
Electronegativity 182
Physical Properties 182
Ionic Radius and Coordination Number 183
Ion Substitution 186
Electrostatic Bond Principle 188
The Silicate Minerals 188
The Oxide and Halide Minerals 197
Minerals with Complex Anions 199

Chapter 10
Geology and the Gem Minerals 201
Structure of the Earth 203
Plate Tectonics 205
Chemistry of the Earth's Crust 209
Igneous Rocks: Plutonic (Intrusive) 211

Igneous Rocks: Volcanic (Extrusive) 216
Sedimentary Rocks 223
Metamorphic Rocks 227

Chapter 11

Laboratory Treatment and Synthesis of Gems 233

Introduction 235
Gem Treatment 236
Gem Synthesis 246
Gem Identification 249

Index 253
